
# eCommerce Sales Dashboard

A comprehensive performance overview across enterprise client's fiscal years 2022–2025 — tracking revenue growth, transaction volume, and channel mix to surface the insights that drive enterprise intelligence and decisions.

DATA ANALYTICS PORTFOLIO | ENTERPRISE INTELLIGENCE | AUTHOR: TEMPESTT GRIFFIN

# Performance at a Glance

Four headline metrics define the eCommerce channel's scale, efficiency, and consumer behavior — the foundation for every strategic conversation.

**$278M**

### Total eCommerce Sales

Cumulative revenue across all fiscal years tracked.

**2M**

### eCommerce Transactions

Total completed digital orders across the period.

**$142**

### eComm Avg. Basket Size

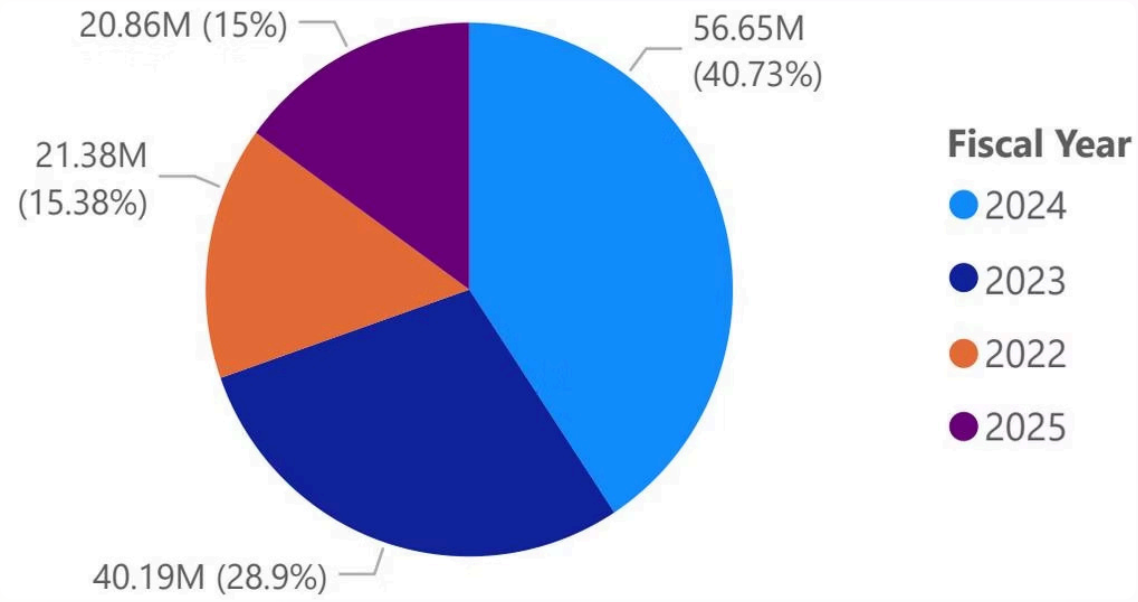
Online shoppers spend more than twice the in-store average.

**$65**

### In-Store Avg. Basket Size

Baseline for channel comparison and margin analysis.

# Sales by Fiscal Year — Distribution



### FY2024 Dominates

**40.73%** of all revenue ($56.65M) was generated in FY2024 alone, making it the single strongest fiscal year on record.

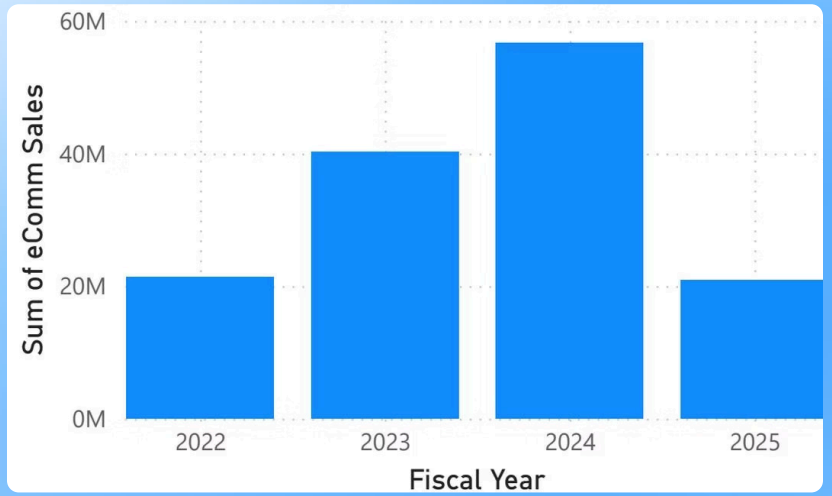
---

### Cumulative Momentum

FY2023 and FY2024 together account for nearly **70%** of total sales, confirming a powerful multi-year growth trajectory before the FY2025 reset.

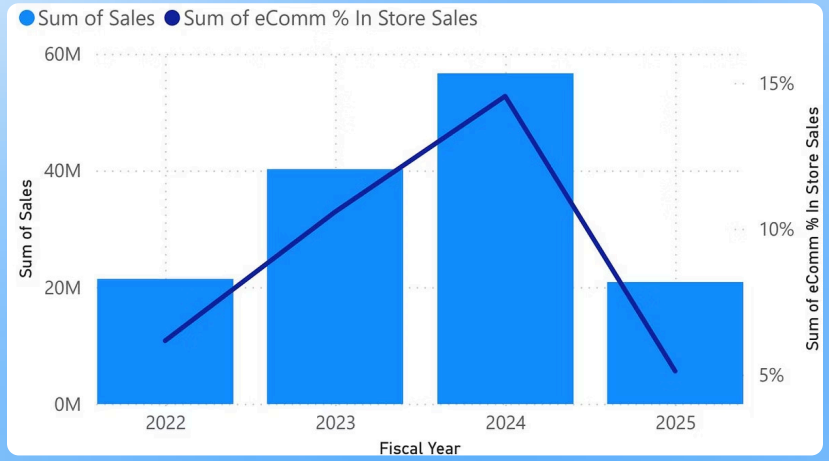
# eCommerce Sales by Fiscal Year

eCommerce revenue nearly **doubled from FY2022 to FY2023** ($21.38M → $40.19M), then surged again to a peak of **$56.65M in FY2024**; a 165% increase over the baseline year. FY2025 reflects a partial-year figure of $20.86M, consistent with early-cycle pacing.



# eCommerce vs. In-Store Sales Mix

The eCommerce share of total store sales climbed from **~6.5% in FY2022** to a peak of **~14.5% in FY2024**, more than doubling the channel's contribution in two years. The FY2025 dip to ~5.5% reflects partial-year data and warrants close monitoring as the fiscal year matures.



# Year-Over-Year Growth Story

### FY2022 — Baseline

$21.38M | 15.38% of total | ~6.5% of in-store sales

1

### FY2023 — Acceleration

$40.19M | 28.9% of total | ~10.5% of in-store sales. **+88% YoY growth.**

2

### FY2024 — Peak

$56.65M | 40.73% of total | ~14.5% of in-store sales. **+41% YoY growth.**

3

### FY2025 — Partial Year

$20.86M | 15% of total | ~5.5% of in-store sales. Tracking in line with FY2022 pacing.

4

# The Basket Size Signal

## eCommerce: $142 Avg. Basket

Online customers spend **2.18× more per transaction** than in-store shoppers — a critical signal for margin optimization and digital investment prioritization.

## In-Store: $65 Avg. Basket

The $77 gap between channels underscores the premium nature of the digital buyer. With 2M transactions at $142, eCommerce is a **high-value, high-leverage channel** deserving continued investment.

# Strategic Takeaways for Leadership

Three high-signal insights every executive and stakeholder should act on.

### Double Down on Digital

eCommerce basket size ($142) is **118% higher** than in-store ($65). Shifting even marginal volume online has outsized margin impact. Prioritize digital acquisition and retention investment.

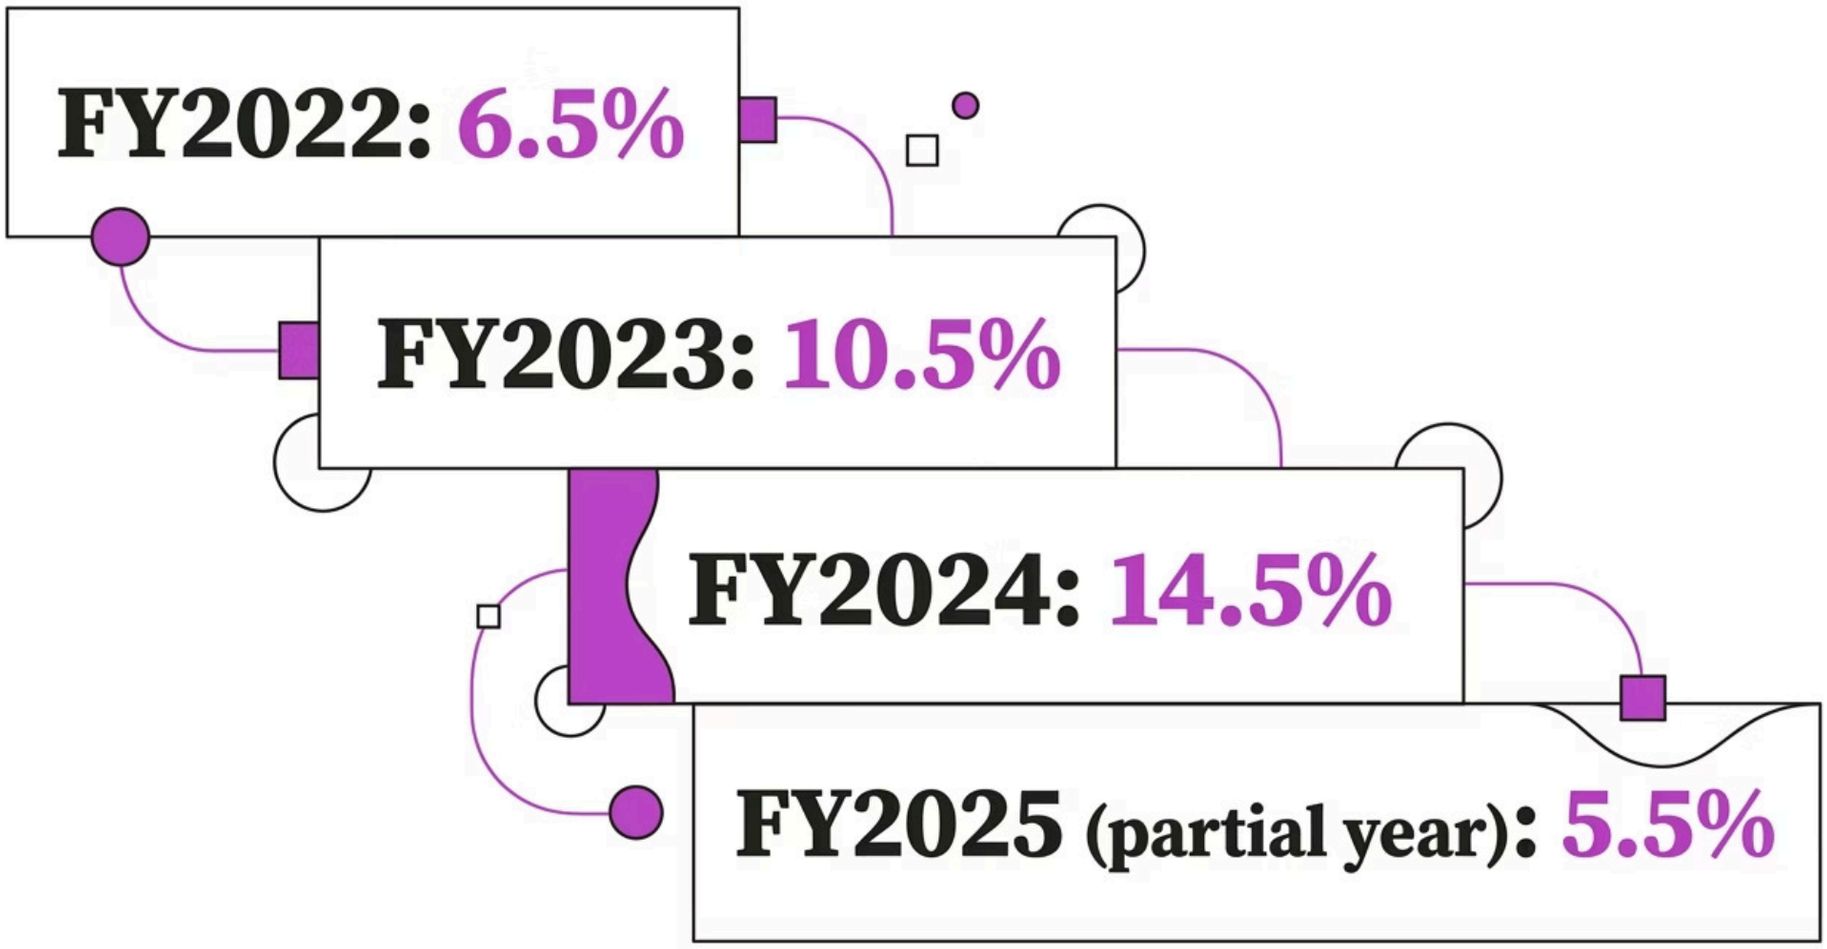
### Protect the FY2024 Peak

FY2024's $56.65M and 14.5% channel share represent a proven ceiling to recapture. Diagnosing what drove peak performance is the highest-ROI analytical exercise available.

### Monitor FY2025 Trajectory

At $20.86M partial-year, FY2025 is pacing similarly to FY2022. Early intervention — promotions, UX improvements, or channel investment — can prevent a multi-year regression.

# Channel Mix: The Bigger Picture



The channel mix trend tells the  clear story that eCommerce's share of total store sales more than **doubled in two years**, peaking at 14.5% in FY2024. Sustaining and growing this share is the defining strategic challenge for the business going forward.

# What This Dashboard Tells the C-Suite

### $278M Proven

Total eCommerce revenue validates the channel as a core business driver — not a supplementary one.

### 165% Growth Ceiling

FY2022→FY2024 growth of 165% establishes a high-performance benchmark to engineer toward.

### 2M Transactions

A 2M-transaction base means even small improvements in basket size or conversion yield millions in incremental revenue.
